

# Lab Summary

---

In this semester, we have had 13 labs (except for week 12) and 12 lab practices (except for week 12 and 14) so far.

We don't have any practice in today's lab. However, there are still lots of stuff that you could do today, including:

- Check-in (签到): **You need to correctly answer teacher's or SA's question about `StandardTests.java` in order to mark your attendance.**
- Finish 12 lab practices if you haven't done so. **You could confirm your attendance records as well as practice completion status with our SAs.**
- Submit surveys (BB -> Exercises & Survey -> Survey), which are due on Jan 3rd, 2024.
- Work on your final project.
- Q&A with teachers and SAs.

All 12 lab practices are due on week 15's lab. If you haven't finished lab practice 1 - 12, please do so before this deadline. We won't be accepting any submissions after this date.
